THE EFFECTIVE ANTIMICROBIAL ABSORBENT FOAM DRESSING

• Minimises pain and trauma at dressing changes\(^1,2\)
• Rapid and sustained antimicrobial activity\(^3\)
• Gentle adherence with better stay-on-ability and comfort
• Does not slip under dressing retention and can be cut to size*  

Safetac® layer  
• Reduces pain and trauma before, at and after dressing change\(^3\)
• Does not adhere to the moist wound bed but to dry skin only
• Seals the wound margins and reduces risk of maceration\(^4\)

Polyurethane foam pad  
• Absorbs exudate
• Works well under compression
• Highly conformable

Polyurethane backing film  
• Breathable
• Shower proof, bacteria and viral barrier*  
* microbes larger than 25nm

Polyurethane backing film  
• Antimicrobial activity within 30 minutes and for up to 7 days\(^3\)

Safetac technology, Less pain and less trauma.  
Safetac is a patented adhesive technology that minimises pain to patients and trauma to wounds. Safetac technology is available exclusively on Mölnlycke Health Care dressings, including Mepilex\(^\text{®}\) wound care dressings, Mepitel\(^\text{®}\), Mepiform\(^\text{®}\) and Mepitac\(^\text{®}\).

For more information visit www.safetac.com

* Mepilex Ag does not need to be cut to the size of the wound when compression is used
How to use Mepilex® Ag

Clean the wound area.
Remove the release film.
Mepilex Ag should overlap the wound bed by at least 2 cm onto the surrounding skin. Apply the adherent side to the wound. Do not stretch.
When necessary, secure Mepilex Ag with a bandage or other fixation.

How Mepilex Ag works
Mepilex Ag is a soft and highly conformable anti microbial foam dressing that absorbs exude and maintains a moist wound environment. The Safetac® layer seals the wound edges, preventing the exudate from leaking onto the surrounding skin, thus minimising the risk for maceration. The Safetac layer ensures that the dressing can be changed without damaging the wound or surrounding skin or exposing the patient to additional pain.

Mepilex Ag inactivates wound related pathogens within 30 minutes with sustained effect for up to 7 days. By reducing the number of microorganisms, Mepilex Ag may also reduce odour.

Benefits of Mepilex Ag
- Minimises pain and trauma at dressing changes
- Stays in place allowing for "hands-free" to facilitate application of compression or retention bandages
- Well suited to be used under compression bandages
- Can be cut to suit various wound shapes and difficult-to-dress locations
- Promotes patient comfort during wear
- Can remain in place for several days depending on the condition of the wound
- Can be lifted and adjusted without losing its adherent properties
- Low potential for skin irritation and allergy

Areas of use
Mepilex Ag is designed for the management of low to moderately exuding wounds such as leg and foot ulcers, pressure ulcers and partial thickness burns. Mepilex Ag can be used under compression bandaging.

Precautions
- Do not use on patients with a known sensitivity to silver.
- Do not use Mepilex Ag during radiation treatment or examinations e.g. X-ray, ultrasound, diathermy or Magnetic Resonance Imaging.
- Do not use Mepilex Ag together with oxidising agents such as hypochlorite solutions or hydrogen peroxide.
